Construction Keywords by Role

Keyword THEMES recruiters search for, by role family. Use a term only if it truthfully reflects your experience - keyword stuffing and false claims are unethical and easily exposed.

Site / Civil Engineer

Setting out, GPS/total station, earthworks, drainage, reinforced concrete, ITPs, QA records, as-builts, RAMS, permits to dig, NEC4, Civil 3D, AutoCAD.

Temporary Works (TWC / TWS / Designer)

BS 5975, design brief, design check categories, falsework, formwork, propping, excavation support, scaffold interface, lifting plans, TW register, PAS 8811/8812.

Site / Construction Manager

SMSTS, programme management, subcontractor management, short-term planning, quality assurance, safety leadership, toolbox talks, commercial awareness, handover.

Project Manager

NEC4/JCT administration, programme (P6/Asta), risk management, early warnings, compensation events, stakeholder management, cost control, reporting, governance.

Quantity Surveyor

NEC4/JCT, valuations, variations, CVRs, subcontract procurement, final accounts, cash flow, measurement (NRM/CESMM), commercial reporting.

Planner

Primavera P6, Asta Powerproject, baseline, critical path, EOT, delay analysis, 4D planning, progress reporting, tender programmes.

H&S / HSE

NEBOSH, IOSH, CDM 2015, RAMS review, audits, incident investigation, behavioural safety, CSCS, safety leadership, ISO 45001.

HV / Energy / Utilities

HV substations, 11kV-400kV, cable installation, jointing interfaces, DNO, National Grid, SSE/UKPN, outage management, commissioning, SAP/AP (state scheme).

BIM / Design Management

BIM coordination, Revit, Navisworks, clash detection, ISO 19650, CDE, design review, RFIs, buildability.

Construct CV - role-specific keyword alignment is part of every CV service.
