Project Achievement Worksheet

Turn "responsible for" duties into truthful, evidence-based achievements.
Complete one sheet per significant project or role.

Step 1 - The project

- Project name / type (e.g. highways scheme, data centre, substation):
- Sector and client type:
- Approximate value band (only if public/known):
- Duration and your time on it:

Step 2 - Your specific role

- Your job title at the time:
- What were YOU specifically accountable for (not the team)?
- Who did you supervise, coordinate or report to?

Step 3 - The technical content

- Methods, standards and systems used (e.g. BS 5975, NEC4, P6):
- Temporary works / HV / safety / design interfaces you handled:
- Software used:

Step 4 - Scale and numbers (truthful only)

- Quantities (m3 of concrete, km of cable, number of piles...):
- Team size / subcontractors managed:
- Programme position (on time? recovered delay? early?):
- Safety record / audits / NCRs:

Step 5 - Write the bullet

Formula: Action verb + what + scale + standard/method + outcome.

Weak: "Responsible for temporary works on site."
Strong: "Coordinated temporary works on a major highways scheme,
managing 25+ design briefs to BS 5975 with zero non-conformances."

Rules: every word defensible at interview. No invented values. No inflation.
